PROFESSIONAL SUMMARY

I am a certified MuleSoft developer with over 6 years of experience in designing and building robust API integrations. My expertise spans across integrating various platforms, including Salesforce, SendGrid, and more. I am passionate about leveraging MuleSoft to create seamless and efficient solutions that drive business success.

SKILLS

Technical Skills: MuleSoft, REST APIs, DataWeave 2.0, API Design, Integration design, API-Led Connectivity, MUnit, System thinking

PROFESSIONAL EXPERIENCE

Data Integration Engineer (MuleSoft) **May 2024 to Present**
TAKEDA INNOVATIONS INDIA PRIVATE LIMITED Bengaluru

- Transitioned from an external consulting role to join Takeda as a full-time Senior MuleSoft Developer, reflecting direct recognition of technical contributions delivered during the engagement
- Continued to own and evolve the enterprise integration landscape, driving stability, performance, and scalability of mission-critical MuleSoft APIs across the organization
- Collaborated closely with internal business and technology stakeholders to align integration architecture with evolving Salesforce Health Cloud and CRM roadmap requirements
- Took on expanded ownership of the HCP onboarding and data synchronization pipelines, ensuring continuous improvement and reliability of key pharmaceutical commercial processes
- Pioneered the adoption of AI-assisted development practices in day-to-day project activities, leveraging AI tools to accelerate integration design, code generation, documentation, and troubleshooting — driving measurable improvements in developer productivity
- Built a custom AI-powered utility to migrate existing MuleSoft applications from Secure Properties to HashiCorp Vault, automating the transition to enterprise-grade secrets management and improving security posture across the integration landscape
- Designed and deployed a custom Splunk dashboard to generate real-time operational metrics around the HCP onboarding pipeline, providing visibility into lead creation volumes, auto-match rates, and qualification trends — enabling data-driven decisions for business and operations teams

Software Engineer **Aug 2019 to Nov 2021**
LTIMindtree LTD Mumbai

- Embarked on a career as a MuleSoft Developer, gaining hands-on expertise in the Anypoint Platform, integration design, and API lifecycle management within a financial services domain
- Developed RESTful APIs following API-Led Connectivity principles, structuring solutions across Experience, Process, and System layers to maximize reusability, maintainability, and scalability across enterprise systems
- Designed and implemented file-based integrations leveraging event-driven architecture patterns, enabling reliable, asynchronous processing of high-volume data exchanges with fault tolerance and decoupled system communication
- Contributed to the end-to-end integration of core financial systems, ensuring secure, compliant, and performant data flows between banking/finance platforms and downstream applications
- Awarded GoMx Phoenix award for excellent ownership, dedication and trust

Senior Software Engineer **Nov 2021 to May 2024**
ACCENTURE SOLUTIONS PVT. LTD. Mumbai

- Spearheaded integration development for a global pharmaceutical client, architecting enterprise-grade

MuleSoft solutions across a diverse technology ecosystem including Salesforce Health Cloud, Send-Grid, SpotMe, and OneTrust

- Designed and delivered API-Led RESTful APIs following Experience, Process, and System layer architecture, enabling seamless integration between mobile applications and Salesforce Health Cloud with maximum reusability and scalability
- Built robust file-based integrations using event-driven patterns to reliably sync high-volume data from external vendors into Salesforce Health Cloud, ensuring data integrity and operational continuity
- Engineered end-to-end HCP (Healthcare Professional) onboarding APIs into Salesforce CRM, incorporating automated matching logic, lead generation workflows, and lead qualification processes — significantly reducing manual intervention in the onboarding lifecycle
- Drove a 30% reduction in lead creation time and manual qualification effort by integrating IQVIA data into the HCP matching process, improving data accuracy and accelerating the onboarding pipeline
- Ensured compliance and data privacy adherence across integrations by working within OneTrust governance frameworks, critical for pharmaceutical regulatory standards

EDUCATION

Bachelor's degree, Information Technology Engineering

2015 - 2019

Pillai College Of Engineering

New Panvel, Mumbai

GPA: 7.75

CERTIFICATIONS

- Salesforce Certified MuleSoft Developer (Jul 2020)
- Salesforce Certified MuleSoft Developer II (Apr 2023)
- Salesforce Certified Agentforce Specialist (Sep 2025)
- Superbadge: Apex for Agentforce
- Superbadge: Advanced Flow for Agentforce
- Superbadge: Agentforce Service
- Superbadge: Prompt Builder Templates
- Agentblazer status - Legend (2025 & 2026)
